

professional strength Immune Therapeutic

Provides Maximum Immune Support During Illness

Beneficial During or After Antibiotic Therapy

Pharmaceutical Grade

Immune Therapeutic has been designed to provide maximum support to your pet's immune system when the animal is already suffering from sickness or disease.

The effectiveness of the **Immune Therapeutic** formula is built on Synermune™ Colostrum, collected from U.S. Grade "A" cows that are free of hormones, pesticides and herbicides. Colostrum is a specialized pre-milk secretion of the mammary gland and an incredible source of immunoglobulins, nutrients, vitamins and minerals, nucleotides, immunoenhancing molecules and growth-stimulating factors. The structures of these components in bovine colostrum are nearly identical to those found in the colostrum of other mammals. These molecules are, therefore, able to function very effectively in the bodies of animals of other species.¹⁻⁷

Along with the powerful immune peptides that are small enough to ensure rapid and efficient absorption via the intestine, colostrum contains a high concentration of cytokines that are rapidly absorbed by the pet. Though short-lived, cytokines are powerful molecules responsible for mediating an immune response such as activating white blood cells and coordinating elimination of infection. Because antibiotics can sometimes have unfavourable effects on an animal, **Immune Therapeutic** is beneficial for post-antibiotic therapy or in conjunction with antibiotic therapy.

ABOUT THE MANUFACTURER

Direct NutriSciences holds a government-issued Natural Health Product Site Licence that exceeds conventional cGMP standards. Product safety is always the highest priority at Direct NutriSciences. All products have been produced in a positively pressured, hepa-filtered environment, which eliminates the threat of any contamination. Direct NutriSciences has developed a reputation of being the leading expert in Formulation and Flavouring in Canada.

Dosage:

15 ml (approximately 3.5 teaspoons) should be added to the pet's water per day with the aim that the water is completely consumed.

Ingredients:

Liquid Synermune™ Colostrum, Potassium Sorbate (0.5%).
