premium Omega3

40:20 Double Strength

iWinDirect uses a double strength, pharmaceutical grade, ultra-pure fish oil to ensure that you are getting the very best quality in your essential fatty acid supplement.

Omega-3's are quickly becoming a mainstream supplement that the whole family should be using due to the enormous research performed on docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA). Both of these biologically active lipids have shown to have health benefits in all life stages. EPA and DHA are beneficial to the integrity of cell membranes, which is important for healthy neuronal development in the brain, eyes and nervous system.

Nobel prize-winning research by Dr. Samulsen has shown that DHA and EPA further metabolize into a class of compounds know as prostaglandins. These are precursors to many key hormones and a reason why Omega-3's can have a positive effect on hormonal regulation.

Omega-3's can also have a powerful effect on heart health. After researchers noticed that Greenland Eskimos had a historical low level of heart disease, it was later determined that this was due to their large intake of an Omega-3's rich fish diet.

This is truly a supplement the whole family could benefit from.
