

balanced SOY Protein

All Natural Formula

How would you like to take a protein supplement that is free of the discomforts that lactose causes and possibly helps reduce the risk of heart disease? How about a protein that supports stable blood sugar levels? We're pleased to introduce to you Balanced Soy Protein from iWinDirect.

Recent studies have shown that diets that are low in saturated fat and cholesterol that include 25 grams of soy protein per day may reduce the risk of heart disease, which the FDA is fully supporting. In addition, Balanced Soy Protein has been sweetened with fructose, one of the lowest glycemic natural sweeteners available. We do NOT use maltodextrin or any other high glycemic natural sweetener because healthy blood sugar levels are extremely important to energy and health.

 **Exceptional Taste**
WINS 6 Out of 7 Times in Blind Taste Test

 **Exceptional Quality**
Made with only Natural Flavours and Sweeteners

 **Exceptional Value**
Direct from the Manufacturer - No Middlemen

To further support optimal blood sugar levels, we have included fibre in the form of inulin and psyllium. Psyllium has been shown to reduce cholesterol, which may also reduce the risk of heart disease.

Green Tea Extract has also been added for its powerful anti-oxidant effects in addition to the multitude of other documented health benefits.

Please log onto www.iWinDirect.com for more information.

Because Balanced Soy Protein has been designed and formulated to be a GMO-free, blood-sugar stabilizing, high protein food supplement, you can feel confident about achieving your daily protein requirements in a safe, convenient and effective way.

ALL NATURAL FORMULA WITH ADDED FIBRE

Ingredients: (vanilla) Pure Premium Soy Protein Isolate (cold temperature water extracted), Inulin (fibre for blood sugar support), Fructose (lowest glycemic indexed sweetener), Natural Flavour, Psyllium (fibre for blood sugar support), Stevia Extract, Green Tea Extract (standardized to 95% polyphenols, 70% catechins, 45% EGCG), Sea Salt, Cassia Extract (standardized for 3% trimeric and tetrameric type-A polymers - absorption support).
